

To Whom It May Concern

Pharmacenter Ltd, headquartered in Budapest, Hungary, is a young, well connected, fast moving specialist distributor company focussed on the oncology and urology therapeutic areas. Hospira (which acquired Mayne Pharma) have worked with Pharmacenter for a number of years as a business partner and value our relationship with the company. Pharmacenter have successfully built oncology marketing and sales channels for Mayne/Hospira's products from an early stage and evolved this into a highly successful business.

More recently, Pharmacenter have expanded into to Slovakia, the Czech Republic, Bulgaria and Romania and we trust that they are able to build a successful oncology and urology business in Eastern Europe.

We consider Pharmacenter to be a valuable partner with a modern and flexible approach to building up oncology and urology marketing and sales channels. This is demonstrated by their successful commercialisation of pharmaceutical products that we have licensed to Pharmacenter over a number of years.

I can recommend the Pharmacenter team from my personnel experience to any company with serious interest in expanding their Eastern European pharmaceutical business activities.

Yours sincerely

Michael Kotsanis  
President, EMEA
